Steering Wheel Control Interface

To suit Mercedes

ASMC3C

Steering wheel controls | Antenna

*If originally fitted. Also provides park brake, reverse and speed signal (VSS) outputs.

Vehicle Fitment

This interface suits the vehicles below.

Vehicle	Year
Mercedes C-Class W203	2000 - 2004
Mercedes CLK	2000 - 2004
Mercedes S-Class W220	1998 - 2005
Mercedes Sprinter	2000 - 2006
Mercedes Vito	2003 - 2006

Before you start: read this manual in full. Installation needs technical knowledge. Your head unit must be SWC compatible, and steering wheel functions may differ from the factory functions. Always disconnect the module before changing any DIP switch.

Installation Steps

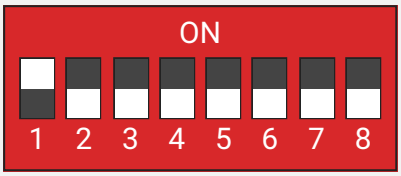

Complete these five steps in order to finish the installation.

1. Set vehicle DIP switches
2. Set stereo DIP switches
3. Connect the interface
4. Connect fibre optic module
5. Set up your head unit

1 Set the vehicle DIP switches (1 to 8)

Disconnect the module before changing any DIP switch. DIP switch: ON OFF

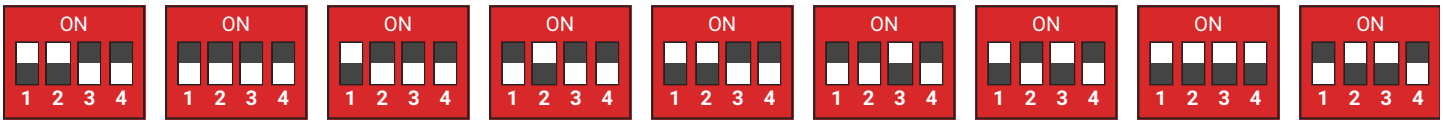

ALL VEHICLES

Switch 1 ON, all others OFF

2 Set the stereo DIP switches (1 to 4)

Set switches 1 to 4 for your head unit brand.

Not listed? Use **Program** and set up SWC Learning in your head unit (see Step 5).

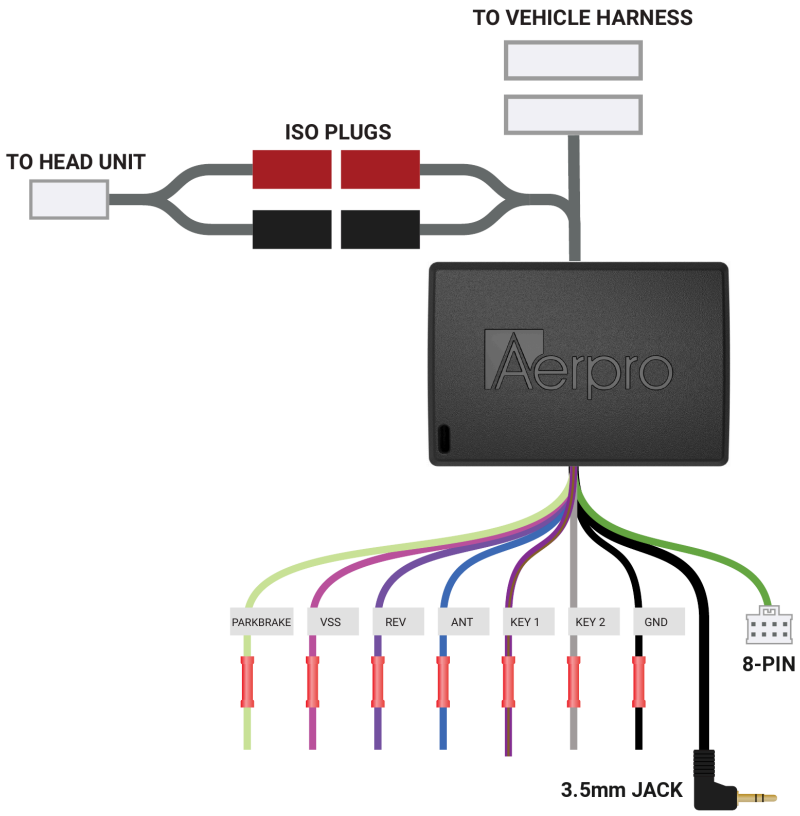

3 Connect the interface

Connect the vehicle plug and ISO plugs, then use the SWC connection that matches your head unit. Most head units only need one.

Your head unit	Connect
Aerpro AM905D, AM1005D, Pioneer DMH-AP6650BT	**8-pin connector and 3.5mm jack**
Aerpro (other), Alpine, Pioneer, Sony, Nakamichi	**3.5mm jack** to the head unit SWC input
Kenwood, JVC	**Key 1 lead** to the SWC wire (SWC function only)
Android head units, Nakamichi Android, Alpine INE-AW409S, INE-AX809	**8-pin connector** (or Key 1, Key 2 and GND)
No plug-in SWC input	**Key 1 lead**, plus Key 2 and GND if needed

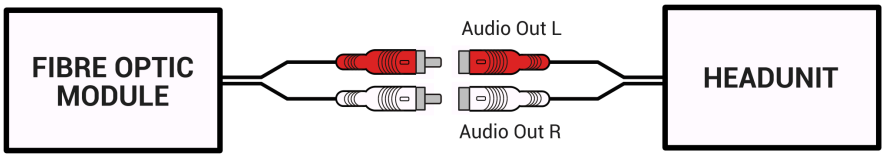

Kenwood 8-pin: a separate Kenwood adaptor is needed for UART functionality.

Step 3 wiring diagram

4 Connect the fibre optic module (If applicable)

If your vehicle has a factory fibre optic audio system, connect the fibre optic module to the head unit RCA pre-outs as shown.

5 Set up your head unit

Find your head unit brand below and follow the setup for it.

Head unit	Setup
Aerpro Incl. AM905D, AM1005D, AM9X, AM10X	• **3.5mm jack:** set stereo DIP switches to 1-ON, 2-ON, 3-OFF, 4-OFF. Go to Settings > Steering Wheel Control > With Adapter. • **8-pin adaptor:** reset the unit > select Hiworld > select vehicle type > program SWC as shown on screen. Factory vehicle info will display.
Alpine, JVC, Kenwood	Work straight away, no setup needed.
Nakamichi	Presets: NA3615 (W7, W9, WX, M9, MX), NA3510-M7, NA3625 (W6, WUX).
Pioneer Other models	Settings > Steering Wheel Control > With Adapter.

Head unit	Setup
Pioneer Incl. DMH-AP6650BT	• **3.5mm jack:** set stereo DIP switches to 1-ON, 2-ON, 3-OFF, 4-OFF. Go to Settings > Steering Wheel Control > With Adapter. • **8-pin adaptor:** reset the unit > select Hiworld > select vehicle type > program SWC as shown on screen. Check the Pioneer website for compatibility.
Sony	Settings > General > Steering Control > Preset. If Preset doesn't work, set stereo DIP switches to 1-OFF, 2-ON, 3-ON, 4-OFF and use Custom.
Android head units Incl. Aerpro AM1205D, Alpine INE-AW409S, INE-AX809, Nakamichi Android	Connect the 8-pin (CANBUS) plug, or Key 1, Key 2 and GND. • **With CANBUS:** set stereo DIP switches to Android > Factory Settings. Alpine password 1967. Nakamichi password 1948, then select Hiworld as provider and choose vehicle type. • **Without CANBUS:** set stereo DIP switches to Program > select SWC Learning in the head unit menu.

Final Check

With the ignition ON, check everything works before refitting the dash.

- [ ] Each steering wheel button works
- [ ] Volume works through the factory amplifier (if fitted)
- [ ] Reverse camera shows in reverse (if fitted)
- [ ] Radio reception is clear
- [ ] USB and AUX play (if fitted)
