AMHXD3

- 1. Make sure you turn off Bluetooth and Wi-Fi on your phone before inserting your Hema module. This will prevent your phone from automatically connecting to the device during the process.
- 2. Open up the HXD3 Application.

3. Once launched in the top right corner, hold the Wi-Fi icon to bring you to the Wi-Fi Settings

4. You may have to turn on Wi-Fi if it is currently turned off, then connect to your home network

11. Tap the Data sync icon again but this time tap the 'Update Now' button to update the Points of interest.

12. Go back to the main menu and navigate to the 'Check for Updates' section in the Hema application by pressing the lines in the top left corner and scrolling all the way down.

13. Tap 'UPDATE MODE' when prompted. The application will restart into boot mode and present another message. Please have a read through it and press OK to continue. This update procedure will approximately take 10-25 mins depending on the internet connection.

14. Once done, press OK and the application will restart.

- 19. The next option to change is the 'Voice Assist' App. This will ensure your PTT button on your Vehicle's Steering Wheel (if supported) takes you to your CarPlay or Android Auto if connected. Make sure this setting is set to 'Speed Play'
- 20. You can restart the device and have now completed the update procedure.
