manual, or other Aerpro manuals/software, please visit the http://aerpro.com website.

FITTING GUIDE

- 1. Remove and disconnect the original head unit.
- 2. Connect the 12 way molex connector of the head unit patch lead (supplied separately) to the interface.

3. Connect the opposite end of head unit patch lead to the head unit steering wheel control input on the back of the aftermarket head unit.

NB:Thismay be a 3.5mm jack plug or a wire input depending upon the head unit brand being fitted. Please see the head unit installation manual for further information on where to connect.

<u>Important: This step must be completed before connecting power to the interface. Failure to so do may result in no steering wheel control function.</u>

4. Connect the 14 way molex connector to the interface

5. Connect the male power/speaker ISOharnessto the female power/speaker ISOharnessfrom the aftermarket head unit. Foraftermarket head unitswithout an ISO connector, please refer to "Wiring Colour Codes" on Pg. 2.

FITTING GUIDE

- 6. Connect the red and white RCA cablesto the aftermarket head unit to retain the vehicle's OEM aux port (if vehicle is equipped)
- 7. Connect the female vehicle specific connectors on the harness to the male vehicle connector from the vehicle. Testhead unit for correct operation.
