

**FACIA KIT
USER/INSTALL
MANUAL**

Product overview

The Aerpro FP9350 VE Facia Installation Kit is Australian designed and engineered and has been made for fitting a double DIN aftermarket radio, CD or DVD player to the original double DIN enclosure. It suits VE series 1 single climate models by upgrading heater valve heating & cooling to full digital climate control. Compatible models for this kit are the Omega, V, Lumina, International, SV6, SS and 60th Anniversary edition. See pictures below as examples.

Inclusions

- 1x ABS Plastic fascia
- 1x H-VAC controller with built in steering wheel control module
- 1x Universal patch lead
- 1x Antenna adapter
- 1x Mounting kit
- 1x Remote temperature sensor

Product structure

- | | |
|---|-----------------------------------|
| 1. Recirculated air button | 5. Fresh air button |
| 2. Left rotary dial button (Rotate,Tap,Hold) | 6. LCD display information screen |
| 3. Right rotary dial button (Rotate,Tap,Hold) | 7. Rear demister button |
| 4. Front demister button | 8. USB charging port |

Screen display

Functions

Powering up

Turn your vehicles ignition ON. To turn the system on press and hold the left rotary dial button. The LCD screen illuminates and the power icon will flash for 3 seconds then illuminates.

Turning air-conditioning ON/OFF

Once powered up, press and hold the right rotary dial button to turn the air-conditioner on. The LCD screen illuminates and air-conditioner icon (Snowflake) illuminates. Press and hold again to turn off. When turning on the air-conditioner the system will remember previous user settings.

Positioning

To select different air positions in the vehicle tap the right rotary button. Positions are for the Head/Feet, Chest, Chest/Feet and Feet (See icons below).

Zone settings

Recirculation button

Tap the recirculation button and the recirculation icon will illuminate.

Fresh air button

Tap the fresh air button and the fresh air icon will illuminate.

Zone settings

Front demister button

Tap the front demister button and the front demister icon will illuminate. The air-conditioner will automatically turn on to aid demisting. The air-conditioner icon will also illuminate.

Rear demister button

Tap the rear demister button and the rear demister icon will illuminate.

Rotary dial functions

Fan speed

Turn the left rotary dial to the right and left to increase and decrease the fan speed. This is represented by the illuminated blue bars.

Air-conditioner temperature

Turn the right rotary dial to the left and right to lower and/or rise the air-conditioner temperature. This is a numeric value of 15 the lowest to 29 the highest. Turning the dial too fast may result in the command signal not registering.

Functions

Automatic climate control

To activate auto climate mode, tap the left hand rotary dial and then set the target temperature by rotating the right hand rotary dial to the desired level. The fan speed, the vent temperature and the air flow direction is fully automatic and will adjust itself based on what it needs to get to the required level.

NOTE: If you change the vent mode (air flow direction) or fan speed during auto climate operation the system will exit climate mode. When in climate mode the words Auto Climate at the bottom of the screen is illuminated and the temperature display has a degree (°) sign next to the numeric value.

Settings for clock/date

Changing the time /date of the vehicles existing clock display

1. Make sure the unit is turned off.
2. Press and hold the right rotary button for 5 seconds to enter the settings for the vehicles existing clock & date.

The existing display in the vehicle will highlight & flash for each value.

3. Turn the right rotary button to the left or right to change each value.
4. Press & hold the right rotary button to apply the value and progress through each setting.
5. Continue through each setting to exit.

Resetting the system

In the case of the system locking up or not functioning correctly, the unit can be reset to factory settings.

Press & hold both left & right rotary knobs at the same time.

INSTALLATION

AFTER

BEFORE

Tools Needed

Use the following tools to make dismantling the car and the installation of the new facia easier

1. Panel Remover

2. Phillips Head Screwdriver

3. Flat Head Screwdriver

4. Cordless Drill with 3/8" Drill Bit

5. Small Pick

6. Electrical Tape

7. Cable Ties

8. Side Cutters

Dash Disassembly

Remove left side dash trim

Insert a panel remover and lever towards you

Remove left side dash trim

Place trim aside safely until trim reassembly

Dash Disassembly

Remove boot button trim

Insert a panel remover or pick and unclip the boot button trim

Remove boot button trim

Place trim aside safely until trim reassembly

Dash Disassembly

Remove left side screw cover trim

Insert a panel remover or pick and unclip the left side screw cover

Remove left side screw cover trim

Place trim aside safely until trim reassembly

Functions and settings

Remove left side dash end trim

Insert a panel remover and lever outwards to remove trim

Remove left side dash end trim

Place trim aside safely until trim reassembly

Dash Disassembly

Remove left side lower dash trim

Insert a panel remover and lever the trim downwards to release

Remove left side lower dash trim

Place trim aside safely until trim reassembly

Dash Disassembly

Remove glove box

There are 2x screws to remove at the base of the glove box as indicated

Remove glove box

Using a Phillips head No.2 screwdriver to remove the indicated screws as shown on the next page

Dash Disassembly

Remove glove box

There are 5x screws along the top and sides to remove as indicated

Remove glove box

Once the screws are removed, hold up the glove box as it will fall out easily

Dash Disassembly

Remove glove box

While holding the glove box up, un-plug the glove box as shown

Remove glove box

Disconnecting this connector will allow you to remove the glove box from the car

Functions and settings

Remove left side center console trim

Insert a panel remover under the center pin of the trim clip and lever it up to release, then remove the clip

Remove left side centre console trim

Once the clip is removed, unclip the side trim starting at the left side

Dash Disassembly

Disconnect antenna connection

With the side trim removed, you now have space to remove the side antenna connection and run desired cables to the back of the stereo

Disconnect antenna connection

Push the top clip down on the connector to disconnect the antenna and slow the factory radio to slide out when necessary

Dash Disassembly

Remove right side dash trim

Insert a panel remover and lever towards you

Remove right side dash trim

Place trim aside safely until trim reassembly

Dash Disassembly

Remove right side dash end trim

Insert a panel remover and lever outwards to remove trim

Remove right side dash end trim

Place trim aside safely until trim reassembly

Dash Disassembly

Remove under steering wheel cover

Insert a panel remover and lever downwards to remove trim remembering to do the same thing on the left side of the steering wheel as well

Remove under steering wheel cover

while unclipping, be sure to hold up the panel and not let it drop to protect the headlight switch connection

Dash Disassembly

Remove under steering wheel cover

remove the connector plugged into the headlight switch and put the trim aside safely for reassembly

Remove right side centre console trim

Using the same method as the left side, remove the trim to expose the radio harness

Dash Disassembly

Unplug the radio connector

To remove the connector, pinch the top clip and pull the handle backwards to release the connector. *NOTE* Remove CD's before unplugging stereo

Unplug the radio connector

Once the connector has been unplugged, the radio is free to be removed

Dash Disassembly

Remove the factory radio face panel

The factory face panel is held on with 4x clips. Start by unclipping the bottom using your hands or panel remover. Take care when unclipping to not damage the face

Remove the factory radio face panel

You will feel the face panel come loose when the clips have released

Dash Disassembly

Remove the factory radio face panel

You may have to pivot the face panel back and forth to release the top clips, or use a panel remover to try release the top clips

Remove the factory radio face panel

There are no cables to disconnect, so you are free remove the factory face panel

Dash Disassembly

Remove the factory radio

There are 4x screws to remove as indicated below

Remove the factory radio

Use and phillips head no.2 screwdriver to remove the screws

Facia Kit Installation

Installing the new facia kit

Now that the factory radio has been removed, you are free to begin installing the new radio

Remove 2x mounting screws

On the inside of the cavity there is a screw on the right side in a recess. Remove the screw using your screwdriver

Facia Kit Installation

Remove 2x mounting screws

There is also a screw on the opposite left side, remove this screw as well and keep the screws handy for re-installation

Installing the temperature sensor

To install the temp sensor, you will need cable ties

Facia Kit Installation

Installing the temperature sensor

Above the heater box is a grill for the air passthrough, you will need to install the temp sensor above this grill

Installing the temperature sensor

Using your hand, feel up above the heater box to find the grill and cable tie the sensor to the top of it as shown in the following image

Facia Kit Installation

Installing the temperature sensor

Run the sensor above the grill and cable tie into place, ensuring the sensor does not fall into the grill where there are moving parts

Preparing the new facia kit

To mount the facia kit, plug the main power harness for the facia in

Facia Kit Installation

Preparing the new facia kit

If your aftermarket stereo is equipped with a steering wheel remote input, plug the steering wheel patch lead in the fascia as well

Preparing the new facia kit

Once the connectors are plugged in, ensure the steering wheel control patch lead is configured for your aftermarket stereo

APUNIP1 & APUNIP2
Universal C type Patch Lead

<p>use 3.5mm Jack for these Head-units</p> <p>Alpine Cut Green Link</p> <p>Clarion Cut Purple Link</p> <p>JVC Cut Green & Purple Link</p> <p>PIONEER, LG & SONY No cutting required</p> <p>use Key 1, Key 2 and GND Bullet terminals for Self Learn Head-units</p>		<p>use Key 1 Bullet terminal for these Head-units</p> <p>Philips, Nakamichi Cut Orange & Purple Wire</p> <p>Kenwood Cut Orange & Green Wire</p> <p>Panasonic Cut Orange & Purple Wire</p> <p>Zenec Cut all 3 wires, under Orange and Green together as Green</p> <p>APUNIP2 only Self Learn Head-units No cutting required</p>
--	--	---

For best results or to reset the control module with a new Brand. Please make modifications to the Patch lead first, before connecting to the steering wheel control module and before powering the module up.

Facia Kit Installation

Mounting the new facia

Run the aftermarket wiring harness through the hole to the right where the factory connector is located

Mounting the new facia

Run the temp sensor neatly to behind the radio and plug it into the facia

Facia Kit Installation

Mounting the new facia

Connect the supplied antenna adapter to the factory antenna connector

Mounting the new facia

Push the facia into the dash cavity so the locator's left and right clip into place

Facia Kit Installation

Mounting the new facia

Ensure the facia is sitting correctly so the holes on the facia line up with the vehicle mounting holes

Mounting the new facia

Using the screws which were removed on pages 20/21 mount the facia to the mounting points in the dash cavity

Facia Kit Installation

Mounting the new facia

Using the screws which were removed on pages 20/21 mount the facia to the mounting points in the dash cavity

Mounting the new facia

For extra security, there is a 3rd mounting point at the base of the facia, using a drill, per-drill a hole in the dash so a screw can be inserted

Facia Kit Installation

Mounting the new facia

For dashes with the black radio face panel, there is a supplied cylinder spacer to avoid damaging the connectors at the rear of the facia when putting the screw in

Mounting the new facia

Use a 30mm screw to secure the bottom of the facia

Note Vehicles with Silver face panel do not require spacer and uses 15mm screw

Facia Kit Installation

Installing the mounting cage

When inserting the mounting cage, run all cables out of the front to make connecting the aftermarket stereo easier

Installing the mounting cage

Use a flat head screwdriver to bend the tabs on the inside of the cage and secure the cage to the fascia

Facia Kit Installation

Installing the mounting cage

When the cage is mounted to the fascia, ensure all cables are run out of the front to make connecting the aftermarket easier. Taping the cables together can help

Mounting the brackets to the aftermarket stereo

The mounting brackets have spring locators that lock into cut outs in the cage. Knowing that the cage cut outs are 18mm back from the edge of the fascia trim will help you determine where to mount the brackets

Facia Kit Installation

Mounting the brackets to the aftermarket stereo

Align the bracket on the stereo and then set the depth using the slider clip depending on how you want the stereo to look in the facia

Testing the system before completing installation

Once the brackets are mounted, slide the unit into the cage, but not the whole way. Connect the quadlock connectors together and turn the key to 'Ignition'

Facia Kit Installation

Completing installation

Once fully powered, check the functionality of the stereo and the facia kit. If all is functioning how it should, you are free to complete the installation

Completing installation

Turn off the car and push the stereo into the cage until it clicks into place

Facia Kit Installation

Completing installation

Click in the fascia trim around the face of the aftermarket stereo

Completing installation

Re-assemble the dash in the reverse order to the disassembly to finish the installation
